

Tanks which were produced by automotive companies (37 photos)

It is no secret that during the Second world war, the civil industry meet the needs of military ministries and departments. We decided to recall some tanks and self-propelled guns produced famous car company during the bloodiest conflict in human history. Gorky automobile plant of GAZ SU-76 factory index SU-12 year of manufacture 1942 1945 Total production volume of 14 292 stationname suppliers of armored vehicles in the Red Army were tractor factories. The plant named after Kirov in Leningrad was collected by the famous KV-1 and KV-2 and the most massive tank of the Second world legendary thirty were produced in Kharkov and Chelyabinsk in the Urals. However, a significant contribution to tank the capacity of the country has made and Gorky automobile plant. Before the war here collected experimental batch floating tankettes T-38 and later began to produce reconnaissance light tank T-70 and created on its basis, self-propelled guns SU-76. The machine is designed for direct fire support of infantry constructively proved to be successful. Light compact unobtrusive drying is quite dynamic due to the coupled power plant of two inline six-cylinder petrol engines with a total capacity of 140 horsepower. Divisional gun ZIS-3 caliber 762 mm allow to effectively fight against most German tanks except the Tiger and tailorwikirules self-propelled guns. Overall the SU-76 has established itself as a good machine is cheap to manufacture simple in operation and efficient for the correct operational use. Unfortunately 76-e were often used not in its basic purpose artpodderzhki infantry of the destruction of the fortified emplacements of the fight against lightly armored targets tanks and armored vehicles. The dryers had to perform the role of breakthrough cars and even fighter tanks that led to high casualties among the crews. From this fact and very telling nicknames machine for example a mass grave. Skoda Works Jagdpanzer 38 t Hetzer Huntsman Sd.Kfz. 1382 Years of production 1944 1945 Total issue volume 3 145 stockprices whole Czech industry fall into the zone of German occupation for seven years supplied the Wehrmacht equipment from military vehicles and rifles to cannons and tanks. Perhaps the most famous armored vehicle made in the Czech Republic self-propelled Jagdpanzer 38 Hetzer. This tank destroyer on the chassis of light tank Pz.38 t developed in the middle of the war as a cheaper to produce alternative to the Stug III tank destroyer. Hetzer in German means Huntsman was a combination of very compact dimensions of length less than five metres in height only about two with a small weight of only 15 tons great frontal armor and powerful weapons. Anti-tank
